## APRIL MILK PRODUCTION (21 STATES)

Milk production in the 21 selected States totaled 10.7 billion pounds (4.85 million metric tons). This was 5 percent more than the production in these same States in April 1985.

During the January-March period, the 21 selected States produced 84.5 percent of the U.S. production. If producers in the 29 States not surveyed on May 1 followed the trend shown by the reporting States, U.S. Milk production would total about 12.7 billion pounds (5.74 million metric tons) for April.

April production per cow in the 21 selected States averaged 1162 pounds, 8 pounds more than March.

Milk cows in the 21 selected States averaged 9.21 million head, 1 percent less than in March.

* * * NOTICE * * *

On May 1, milk production surveys were conducted in 21 States having about 85 percent of U.S. milk production. All States will be surveyed on the quarterly dates of January 1, April 1, July 1, and October 1. Milk production in the 21 States has been expanded to a U.S. total using January-March relationship of the 21 States to the U.S. total production. The U.S. figure is shown in the above text only. The program change was necessitated by fund limitations.

## MAY MILK PRODUCTION (SELECTED STATES)

Milk production in the 21 selected States during May totaled 11.2 billion pounds (5.08 million metric tons). This is 3 percent more than the production in these same States during May 1985.

During the January-March period, the 21 selected States produced 84.5 percent of the U.S. production. If producers in the 29 States not surveyed for June 1 followed the trend shown by the reporting States, U.S. Milk production would total about 13.2 billion pounds (6.01 million metric tons) for May.

Production per cow in the 21 selected States averaged 1223 pounds, during May, 36 pounds above May 1985.

Milk cows in the 21 selected States averaged 9.16 million head, about 1 percent less than April 1986.

## JUNE MILK PRODUCTION

Milk production in the 21 selected States totaled 10.8 billion pounds (4.89 million metric tons). This is 2 percent more than production in the same States for June 1985.

Production per cow in the 21 selected States averaged 1182 pounds for June, 33 pounds above June 1985.

The number of cows on farms in the 21 States was 9.11 million head, 42 thousand less than May and 122 thousand below June last year.

During the April-June period the 21 selected States produced 32.7 billion pounds (14.8 million metric tons), 84.8 percent of the U.S. production. If producers in the remaining 29 States not surveyed followed the same production trend as the 21 States, the U.S. production would have been 12.6 billion pounds (5.72 million metric tons) in April, 13.2 billion pounds (5.99 metric tons) in May, and 12.7 billion pounds (5.76 million metric tons) in June.

## APRIL-JUNE MILK PRODUCTION

The quarterly production of milk for the U.S. was 38.5 billion pounds (17.5 million metric tons), up 3 percent from April-June last year.

The average number of milk cows in the U.S. during the April-June quarter was 10.9 million head, down slightly from the 11.0 million head last year.

## GRAIN & OTHER CONCENTRATES FED

Grain and other concentrates fed to milk cows on July 1, 1986, averaged 16.2 pounds, 0.4 of a pound more than July 1, 1985.

## VALUE OF GRAIN & OTHER CONCENTRATES

The value of grain and other concentrates fed to cows on July 1, averaged $7.01 per hundredweight, 42 cents per hundredweight below the July 1, 1985, price.

## JULY MILK PRODUCTION (21 STATES)

Milk production in the 21 selected States totaled 10.5 billion pounds (4.78 million metric tons). This was 1 percent less than production in these same States for July 1985.

During the April-June period the 21 selected States produced 84.8 percent of the U.S. production. If producers in the 29 States not surveyed for August 1, followed the trend shown by the reporting States, the U.S. milk production would total about 12.4 billion pounds (5.64 million metric tons) for July.

Production per cow in the 21 selected States averaged 1166 pounds during July, 15 pounds above July 1985.

Milk cows in the 21 selected States averaged 9.05 million head, 1 percent less than June 1986.
